

SEDco Capital Global Technology Equity Feeder Fund

Quarterly Statement - Q2 - June 2026

Fund Objective:

The Fund aims to achieve long-term capital growth for its unitholders by primarily investing in SEDco Capital Global Technology Equity Passive Fund ("the Master Fund"), which is Shariah-compliant and registered in Luxembourg. The Fund targets investment in the master fund, which in turn invests in the constituent stocks of the benchmark index with the objective of achieving long-term capital growth. The Fund will not distribute any dividends, as it aims to reinvest all generated income back into the Fund.

Definitions

Standard deviation

The standard deviation of an investment's returns is a measure of how much they can differ from its average return. It is a measure of risk and, as a result, volatility. Investors can use the standard deviation as a risk indicator to see how volatile their investments have been in the past. A higher standard deviation indicates that an investment is more variable or riskier. $= \sqrt{(\sum (Rp - Avg(Rp))^2 / (n - 1))} \cdot \sqrt{252}$

Sharp indicator

The Sharpe ratio is a tool that allows investors to compare the return on investment to the risk involved. This ratio is derived by subtracting the risk-free rate from the return of the portfolio and dividing the result by the investment's standard deviation. $= (Rp - Rf) / \sigma p$

Tracking Error

Tracking error is a financial performance metric that evaluates the difference between an investment portfolio's return variations and the return fluctuations of a set benchmark. Standard deviations are the most common way to measure return variability. $= \sigma(Rp - Rb) \cdot \sqrt{252}$

Beta

The volatility of a mutual fund in relation to its market benchmark is known as beta. $= Cov(x, y) / Var(x)$

Alpha

For a given level of risk, alpha is the excess return over the market benchmark. $= R - [Rf + Beta \cdot (Rm - Rf)]$

Information Ratio

The information ratio demonstrates the fund manager's consistency in providing superior risk adjusted performance.
